

EDUCATION AND TRAINING

TRAINING CD-ROM. NAVORDSAFSECACT and NSWC Crane are developing a training program on CD-ROM that will assist Navy and Marine Corps personnel with interpreting and utilizing the guidance of OPNAVINST 5530.13B "DoN Physical Security Instruction for Conventional Arms, Ammunition and Explosives (AA&E)". The CD-ROM will utilize the format of OPNAVINST 5530.13B, allowing the user to navigate to any portion of the instruction, or to use the CD in a more structured training environment. A word search engine will be included to aid the user in locating the appropriate section of the instruction. Interactive help, in the form of pictures, narration and explanations will be available to introduce the user to key security issues and the Navy's requirements to handle these issues. In areas of the instruction where written documentation is required as part of a security procedure, a link to a "Forms Catalog" will be provided where the user can print the forms required for use. Interactive links to appropriate web sites will be provided to keep the user apprised of the latest updates, equipment, and solutions. The training CD-ROM will be a valuable tool for anyone with AA&E-related responsibilities.

PHYSICAL SECURITY COURSES. Various physical security courses are available to Navy and Marine Corps personnel. Recommended classes, sources, and points of contact are as follows:

- **Conventional Physical Security/Crime Prevention:**

This course is taught at Fort Leonard Wood, Missouri. The goal of this course is to train students to plan and implement proper physical security measures to prevent terrorist acts, prevent espionage and sabotage, control pilferage, and prevent property crimes in military communities and on military installations.

- **Combating Terrorism:** This course is also taught at Fort Leonard Wood, Missouri. The goal of this course is to train personnel who direct or apply resources to develop or implement antiterrorism and a systematic approach to antiterrorism.

- **Dynamics of International Terrorism:** This course is taught at the U.S. Air Force Special Operations School, Hurlburt Field, Florida. The goal of this course is to provide students with knowledge and a basic level of awareness to the international terrorist threat. Students will also learn and understand available protective techniques to minimize their vulnerability to attack.
